

Advance Institute of Cosmetology Aesthetics & Trichology

AESTHETIC DENTISTRY FELLOWSHIP

COURSE OBJECTIVES

- Using simplified systemic documentation, learn to comprehensively evaluate patients.
- Learn to evaluate the four major diagnostic parameters that affect and define success in treatment outcomes using a risk assessment protocolized triage
- Learn to transfer treatment planning techniques to case presentation that leads to patient acceptance
- Using a protocol that evaluates periodontal, biomechanical, functional, and dentofacial issues, learn how to recognise, assess, and account for risk.
- Discover how to incorporate the four diagnostic parameters into treatment plans and sequences that reduce risk and increase long-term success.
- Learn how to help patients understand their condition so that they can be more involved in their own care.

ALL ABOUT VENEERS

This section unveils all the secrets about veneers. designed to teach all aspects of veneers from case selection, preparation cementation, finishing and polishing.

- Improve knowledge in case of selection based on patient requirements and considering occlusion scheme.
- Veneer preparation based on biomimetic principles.
- Veneer preparation with guides made from wax-ups.
- Learn about non-prep veneers.
- Temporization of veneers C.
- cementation of veneers (Feldspathic, E-max, Zirconia).
- Finishing and polishing protocol for veneers of different materials.

ALL ABOUT CERAMICS

- This section focuses on all types of ceramic materials used for restorations.
- Learn and understand the science behind the materials .
- Learn different restorative materials from the ceramist aspect and dentist aspect .
- Understand different ceramics fabrication .
- Learn and understand the properties and differences between natural teeth and ceramics .

COURSE SCHEDULE (DAY - 1)

Lectures

- Smile designing
- Golden proportion
- Multidisciplinary approach
- Case selection
- Diagnosis and treatment planning

Live Demonstration of the Patient

- Crown preparation
- Rubber base impression
- Temporization

Ceramic Laminates

- Shade Matching
- Mock preparation and Wax up
- Selection of burs
- Step by step preparation
- Gingival retraction
- Final impression
- Various cementing materials are available
- Cementation

Hands-on

- Preparation of the natural/typodont teeth
- Rubber base impression
- Temporization

COURSE SCHEDULE (DAY - 2)

Pink Esthetics/Perioesthetics

- Periodontal health and maintenance
- Biological width
- Latrogenic effects of improper restorations and prosthesis
- Perio-prostho-inter-relationship gingivoplasty
- Crown lengthening

Direct Composites Laminates

- Step by step preparation
- Etching & bonding
- Layering technique
- Finishing, Polishing by rainbow technique

Composite Laminates

- Material selection
- Etching, Bonding
- Advances in the composite materials and bonding agents
- Shade selection

Anterior Composite Restorations

- Class IV cavities & Class V cavities
- Posterior composite restorations cavity preparation principles
- Matrix band placement
- Layering technique
- Diastema closure
- Demonstration of final cementation of laminates

Certification

After The Completion Of Course International Accreditation Organization (IAO)Based Certificated Will Be Handed Over To Each Student
